

Electric Counterbalanced Stacker
Capacity 600 to 1600 kg
L06 AC, L10 AC,
L12 AC, L16 AC

Series 1170

Safety

The Linde tiller arm provides optimum protection for the operator's hands. Automatic speed reduction when cornering, automatic braking on releasing the traction control. Electro-hydraulic braking is actuated by the emergency stop button, proportional to the load carried.

Performance

The electric counterbalanced pallet stackers provide all the versatility of a front-seat stacker, easy to operate and economical to buy. It is the ideal solution for short-distance operation and medium lifting heights. Drive, lifting and electrical steering motors are designed for high sustained output performance. The Linde OptiLift® control offers a genuine proportional lifting/lowering with load capacities up to 1,600kg.

Comfort

The handles and controls are skin-friendly material, making them pleasant to operate. The operating elements are user friendly, with drive and lifting functions capable to be operated with left or right hand from the tiller without reaching across. Inclining movements of the mast is actuated with fine sensitivity of a lever positioned for optimum access.

Reliability

The pedestrian counterbalanced stacker can be used wherever load arms stackers can not operate. With a compact turning radius and a good manoeuvrability, the truck can operate with ease in confined warehouse areas.

The frame is made of high-strength steel components with extremely good torsional rigidity and provides easy access for servicing work.

Service

The digital multifunction instrument display ensures the operator is always well informed. CAN bus connectivity enables all truck data to be transmitted to a laptop by the service technician. Easy accessibility of all components and maintenance-free AC technology also play an important role in maximising truck uptime.

Linde Material Handling

The Linde logo, featuring the word 'Linde' in a white, cursive script font, set against a red background.

Standard Equipment/Optional Equipment

Standard Equipment

Linde OptiLift®: proportional control on the tiller

Power assisted steering

Automatic speed reduction when cornering

Positive steering (drive wheel) feedback

3kW AC motor (maintenance free)

Electro-hydraulic emergency brake acting proportionally to the load weight

Key switch or Log in PIN code (no extra) Dedicated work station (with storage compartments)

CAN bus technology

Multifunction backlit instrument display: Safety alarm, maintenance check indicator, battery charge level, hour meter

Polyurethane wet grip drive wheel

Polyurethane load wheels

Mast protection: polycarbonate or mesh wired (no extra)

Vertical battery change

Protection -10°C

Optional Equipment

Tilting mast (+ 1° / - 6°) (on the L10/12/16 AC)

Biometry access

Load backrest (h=1,000mm)

Soft landing of fork carriage

Support for data terminal or barcode reader (Pack n°2)

Ultra fast lifting

Side battery change (3 & 4 PzS)

Vertical battery change (5 PzS on the L16 AC)

Cold store protection -35°C

Mobile and fixed battery stand (for side battery change)

Other options available on request

Technical Data according to VDI 2198

Features

Chassis & Mast

- Rounded contours, no sharp edges
- Highly resistant, robust steel construction
- Rigid clear view mast optimizes visibility
- Wide choice of masts
- Low chassis skirt protects operator's feet

Tiller & Power steering

- All traction and lift function are integrated into the tiller and can be operated with either hand and gloves
- Effortless, electric power steering
- Automatic speed reduction when cornering

OptiLift® control

- Intuitive controllability of the tiller, as well as all lifting functions
- The proportional OptiLift® control brings quiet smoothness and precision
- Compact, energy efficient, high performance lift unit with no waste of energy

Braking system

- Automatic braking
- On releasing the traction butterfly, with no energy consumption
- By selecting opposite direction of travel
- Emergency brake
- Electro-hydraulic
- On pressing the emergency button
- Hydraulic-assisted system, proportional

Energy

- Wide range of batteries from 250Ah (2PzS) to 625Ah (5PzS)
- Efficient battery locking system for side change option secures battery in compartment
- Battery discharge indicator
- Lift lock when the battery is at low charge for longer life time

Working station

- Digital, multifunction, backlit instrument display informs the operator of key truck information
- Truck access by key switch or by PIN code (no-cost option)
- Generous storage compartments are conveniently located for shrink-wrap, work gloves, writing utensils, etc

AC motor

- Powerful, high torque drive motor, 3kW at 100% performance
- Moisture and dust-proof, maintenance-free motor
- No rollback on gradient starts
- Top speed of 6km/h

Maintenance/CAN-bus architecture

- Rapid and convenient access to main components via front service panel
- Intelligent CAN bus electronic management of all components for rapid and easy configuration and diagnosis
- Electrical system and wiring are protected to IP 54 (connectors IP 67), ensuring greater reliability over time
