Features

- → Four-point contact configuration for maximum stability
- → Top speed 10 km loaded, 12 km/h unloaded
- → Automatic braking on releasing the travel switch
- → Well controllable regenerative braking on reversing direction of travel
- → Electromagnetic braking initiated by the emergency stop button acts on the drive motor, proportional to the load carried

Batteries for every need

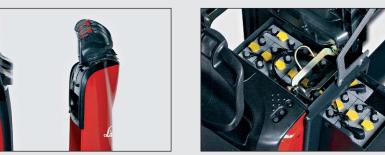

- → Vertical battery change as standard, optional side battery change left or right
- → Wide range of batteries (low & high) from 270 Ah (3 PzS) to 620 Ah (4 PzS)
- → Battery locking system for side change option secures battery in compartment and ease the battery change

Linde control handlebars

- → Ergonomic design and position
- → Optimum protection for both hands
- → All main control functions integrated in the one handle for operation by either hand or both
- → Handlebar height adjustment (optional)

CAN bus connectivity

- → Electronic management of all components permitting quick and easy diagnosis
- → All performance parameters can be configured exactly by the service technician for every individual

Workstation

- → Digital multifunction display
- → Truck activated by PIN code or by igni-
- → Wide and deep storage compartments in front and centre for wrapping paper, work gloves, writing utensils, etc.
- → Adjustable scoop seat height to provide comfortable and secure riding position

- → Powerful, smooth-running 3 kW (at 100 % performance) AC motor
- → Moisture- and dust-proof motor, zero maintenance requirement
- → Gradeability 13 % fully loaded
- → No rollback on uphill starting
- → Forceful acceleration takes truck to top speed within 5 metres

Power steering

- → Proportional power-assisted steering, self-centering and effortless to operate
- → Adjustable steering feedback resulting in outstanding stability
- → Automatic speed reduction when cornering
- → Manoeuvering effort varies depending on the turning angle

Safety

Compact design of the Linde control handlebars ensures that the operator remains well within the truck contours while driving. Ergonomic design of the twin grips enclosed by a hand guard and a 4 mm thick steel front shield assure excellent safety for the operator.

Performance

Powered by an AC motor of 3 kW output, the N 20 remains steady, accelerates rapidly and safely to top speed of 10 km/h loaded and 12 km/h unloaded. A speed of 12 km/h with or without load is attainable with the HP configuration, equipped with active castor wheels to enhance productivity in intensive (long transfers) applications.

Comfort

Precision working at the highest level of performance calls for a high level of operator comfort. The adjustable backrest and handlebar (optional), added to the full-suspension platform surfaced with a cushioning non-skid mat provide superior comfort. Well equipped & designed, the unique truck architecture leads to an efficient picking.

Reliability

Linde Material Handling

The robust chassis of high-grade steel construction contributes to increase the life time of the truck as well as improved performance on the job. Sturdy forks; up to 2900 mm long, are capable of carrying four roll cages at a time as the task demands.

Low-Level Order Picker

Capacity 2000 - 2400 kg

N 20 / N 20 / 24 HP SERIES 132

Efficiency at work, efficiency at the cost level. CAN bus connection enables all truck data to be read out for inspection when servicing becomes due at intervals of 1,000 operating hours. Easy accessibility of all components and the maintenance free AC technology employed play an additional part in keeping truck uptime up.

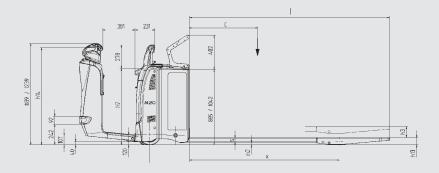

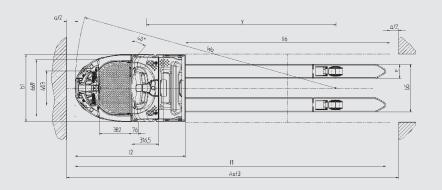

Technical data (According to VDI 2198)

	1.1	Manufacturer			LINDE	LINDE
