TOW DIAGRAMS

P60

- Example
- Permissible haul per hour (m)*
- Speed (km/h)
- Load (t)

* The permissible haul per hour is the total distance travelled, including the return journey and any downhill gradients.

The example shown illustrates a tractor that is transporting 4 t, on a ramp of 5% gradient, with a maximum driving speed of 7.5 km/h and a maximum travel distance of 3700 m per hour.

Information

Unbraked trailer load recommendation

	P60	P80
Maximum recommended unbraked trailer load	2.5 t	2.5 t

For trailer loads exceeding 2.5 tons and for all trailer loads where a gradient is involved it is recommended that braked trailers are used.
